

## Recoupment statement - Screen Flanders

I/we, the undersigned (co)producer(s) of the project entitled \_\_\_\_\_  
accept the required recoupment position for Screen Flanders.

If financial support has been awarded to this audiovisual production, Flanders Innovation & Entrepreneurship (VLAIO) will receive a percentage of all net receipts as mentioned in part 3.3 of the manual, generated through the exploitation of the audiovisual work, as of the first euro in net receipts, in first rank and at the same time as other financiers.

This percentage is equal to the share of the support definitively received (after the final check-up of the project) in the financing definitively acquired.

Repayment is entirely independent of the support amount and must conform to the approved recoupment schedule. If earnings are low, the repayments may be lower than the support received, while if earnings are high, the repayments may be higher than the support received.

The recoupment percentage is set provisionally by the jury and included in the decision of support allocation. It is only adjusted at a later date if the accepted total budget (financing definitively acquired) falls (recoupment percentage rises) or if the aid is reduced, withdrawn or reclaimed (recoupment percentage falls). The recoupment percentage cannot fall as the result of a higher total budget.

Only the costs mentioned in article 47 of the Flemish Government decree of 8 December 2017 (decree Screen Flanders) can be deducted from the net receipts.
